TECHNICAL SKILLS

Programming: Java, Python, SQL

Data Analysis and BI: Excel, Power BI, DAX, Power Query, Pandas, NumPy, Data Cleaning, EDA, KPI Analysis, Data Visualization

Databases and Backend: MySQL, MongoDB

Development Tools: Git, GitHub, Jupyter Notebook, Streamlit

EDUCATION

B.Tech. in Computer Science and Engineering, NSHM Knowledge Campus, Durgapur *CGPA: 7.25 (up to 6th Sem)*

PROJECT EXPERIENCE

E-Commerce Sales Performance Analysis Dashboard

Power BI, DAX, SQL, Excel, Python

[GitHub](#)

- Analyzed e-commerce sales performance across **revenue, order volume, average order value, and quantity sold** to evaluate overall business performance and trends.
- Compared **product categories, regions, and category-region combinations** to identify major revenue contributors and relatively weaker-performing segments.
- Built an interactive Power BI dashboard with **KPI cards, revenue trends, category analysis, and regional visualizations** for business performance monitoring.

Customer Churn Analysis Dashboard

Power BI, DAX, Excel, Data Analysis

[GitHub](#)

- Analyzed customer churn to measure the **overall churn rate** and identify customer groups associated with higher customer attrition.
- Compared churn rates across **contract type, tenure, internet service, payment method, and customer characteristics** to identify high-churn segments.
- Built an interactive Power BI dashboard using **DAX measures, KPI cards, slicers, and segment-level visualizations** to monitor churn patterns.

E-Commerce Delivery & Logistics Performance Analysis

MySQL, SQL, Power BI, DAX

[GitHub](#)

- Analyzed **50,000 e-commerce orders** using MySQL to evaluate late-delivery performance across shipping methods, carriers, warehouses, and operational factors.
- Calculated and compared **late-delivery rates, average delivery delays, shipping costs, and customer ratings** using SQL-based aggregation and segmentation.
- Built an interactive Power BI dashboard with **DAX KPIs, slicers, trend analysis, and logistics performance visualizations** to monitor delivery operations.

LEADERSHIP & RESPONSIBILITY

Technical Coordinator

College Coding Club

- Managed and maintained the official coding club website, implementing feature updates, bug fixes, and performance improvements.
