Technical Skills

Programming Languages: Python, SQL, Java

Databases: Microsoft SQL Server, MySQL

Tools: Power BI, Excel, SSMS, MySQL Workbench, Jupyter Notebook, Git, GitHub

Education

B.Tech. in Computer Science and Engineering *Expected June 2027*

NSHM Knowledge Campus, Durgapur *CGPA: 7.25/10 (up to 6th semester)*

Project Experience

Customer Analytics and RFM Segmentation *SQL Server, Python, Power BI, DAX*

GitHub

- Cleaned and validated **1M+ retail transaction records** using SQL Server, resolving mixed date formats, invalid records, and 32,907 duplicate rows.
- Applied **RFM analysis in Python** to segment 5,881 customers into six groups and identify retention risks using a 90-day inactivity threshold.
- Built an interactive **Power BI dashboard** tracking revenue, customer value, and churn, revealing that Champions generated approximately **68% of total revenue**.

Customer Churn Analysis Dashboard *Power BI, DAX, Excel*

GitHub

- Analyzed customer retention for a telecommunications business using **7,043 customer records** to measure churn and identify customer segments requiring retention attention.
- Segmented churn by **contract type, tenure, internet service, payment method, and customer characteristics**, finding substantially higher observed churn among month-to-month customers and newer customers.
- Built an interactive Power BI dashboard with **DAX KPIs, slicers, and segment-level analysis**, enabling stakeholders to monitor churn patterns and prioritize high-churn customer groups.

E-Commerce Delivery & Logistics Performance Analysis *MySQL, Power BI, DAX*

GitHub

- Analyzed **50,000 e-commerce orders** to evaluate delivery performance and identify operational factors associated with late deliveries across shipping methods, carriers, and warehouses.
- Used SQL to compare **late-delivery rates, delivery delays, shipping costs, and customer ratings**, finding a **56.32% overall late-delivery rate** with meaningful variation across shipping methods and carriers.
- Built an interactive Power BI dashboard with **DAX KPIs, slicers, trends, and operational breakdowns**, providing a centralized view for monitoring logistics performance and investigating delay patterns.

Leadership & Responsibility

Technical Coordinator *College Coding Club*

- Managed and maintained the official coding club website, implementing feature updates, bug fixes, and performance improvements.
